SUMMARY REPORT
FT 930-I

April 1965

FOR RELEASE
June 25, 1965

IMPORT TRADE BY COMMODITY

The Bureau of the Census, Department of Commerce, announced today that the decrease in U.S. general imports of merchandise from $2,040.2 million in March to $1,934.9 million in April[1] [2] reflected decreases in imports of 8 of the 10 Schedule A commodity sections. The more notable decreases were in imports of food and live animals; manufactured goods classified chiefly by material; inedible crude materials, except fuels; mineral fuels, lubricants, and related materials; and beverages and tobacco.

Imports of food and live animals, decreased from $338.4 million in March to $298.6 million in April due largely to lower levels of imports of fresh or frozen beef, from $21.0 to $9.1 million and coffee, from $126.0 to $83.7 million. However, imports of sugar rose from $26.5 to $39.2 million. Manufactured goods classified chiefly by material decreased from $531.0 million to $438.7 million owing in part to decreases in imports of standard newsprint paper, from $69.2 to $42.7 million; woven jute fabrics, from $29.6 to $19.2 million; and iron and steel mill products, from $113.6 to $100.4 million. However, offsetting these decreases, was a sizeable increase in imports of copper and alloys from $[illegible].1 to $50.3 million.

The decrease in imports of inedible crude materials, except fuels, from $298.0 to $262.6 million, was due primarily to decreases in imports of lumber, from $36.1 to $28.9 million; wood pulp, from $37.7 to $31.9 million; textile fibers and waste, from $58.0 to $45.0 million; and nonferrous base metal ores and concentrates, from $35.3 to $28.4 million. Imports of mineral fuels, lubricants, and related materials decreased from $215.2 to $196.0 million owing chiefly to the decline in imports of crude petroleum, from $106.1 to $99.5 million; petroleum products, from $91.7 to $84.8 million; and natural and manufactured gas from $14.6 to $9.5 million. Imports of beverages and tobacco decreased from $73.3 to $61.3 million mainly as a result of a decrease in imports of unmanufactured tobacco, from $35.8 to $26.1 million.

Changes in the overall totals for other Schedule A commodity sections from March to April were as follows: decreases occurred in imports of commodities and transactions not classified according to kind, from $64.3 to $43.0 million; miscellaneous manufactured articles, from $169.3 to $160.0 million; and chemicals from $75.7 to $73.1 million, while increases were reported in imports of animal and vegetable oils and fats, from $11.1 to $13.9 million, and machinery and transport equipment, from $263.8 to $265.8 million.

[1] On a seasonally adjusted basis, total general imports were valued at $1,934.7 million in April as compared to $1,869.[illegible] million in March. (See the April 1965 issue of Report FT 930-I.)

[2] The Bureau of the Census does not have adequate information to measure precisely the influence on the statistics of the dock strike in 1965 at east coast and gulf ports.

EXPLANATION OF STATISTICS

COVERAGE. Import statistics include merchandise imported by government agencies as well as by private importers, but exclude American goods returned by the U.S. armed forces for their own use. U.S. trade with Puerto Rico and U.S. possessions is not included in this report but the import trade of Puerto Rico with foreign countries is included as a part of the U.S. import trade. Merchandise shipped in transit through the United States between foreign countries is not included in import statistics. However, the statistics may include some merchandise (principally duty free) which is entered through U.S. Customs and subsequently exported in the same condition in which imported. In many cases, such merchandise differs from in transit merchandise only in the manner in which it is documented.

VALUATION. The dollar value shown in the import statistics is defined generally as the market value in the foreign country, excluding the U.S. import duties, ocean freight and marine insurance.

RELIABILITY: The statistics presented in this report are based partly on sample data (i.e. formal entries valued under $100 and all informal entries valued $250 and under), and therefore are subject to sampling variation that may cause them to differ somewhat from the results which would have been obtained from processing all import entries. The probable variability due to sampling is either less than $50,000 (the largest variation from rounding of figures) or less than 1 percent of the individual totals shown.

Further information regarding coverage, valuation, compilation procedures and precision of import data is contained in the foreword of Report FT 125. For complete statement, see foreword in Foreign Commerce and Navigation of the United States.

U.S. GENERAL IMPORTS OF MERCHANDISE BY SELECTED SCHEDULE A COMMODITY GROUPINGS AND PRINCIPAL COMMODITIES
APRIL 1965 AND SELECTED PERIODS

(Quantity in units indicated; value in millions of dollars. General imports are commodities imported for immediate consumption plus entries into bonded warehouse. Imports for consumption are commodities imported for immediate consumption plus withdrawals for domestic consumption from bonded warehouses. Figures for 1965 are as originally issued and have not been revised to include published corrections. Figures for 1964 include all revisions published with December 1964 reports, or earlier, but do not include revisions published during 1965. Totals represent sum of unrounded figures, hence may vary slightly from sum of rounded amounts)

*The Bureau of the Census does not have adequate information to measure precisely the influence on the statistics of the dock strike at east coast and gulf ports, which began January 11, 1965, and, in general, continued through the middle of February, although ending on different dates at individual ports.

**The April 1965 statistics for this commodity are undercounted. See the "Special Announcements" section of the April 1965 issue of Report FT 125.

- Represents zero.

Z Indicates less than $50,000.

[1]Based on the commodity classifications listed in Schedule A, Statistical Classification of Commodities Imported into the United States, as published in the special Census Bureau publication entitled "Changes in Presentation of U.S. Import Statistics Effective 1964." A "Supplement" to Report FT 930-I showing the coverage for the individual commodity totals in terms of the Schedule A classifications is available on request.

[2]Excludes, also, wool-like hair of other animals (see footnote 8) whether on or off the skin. Wool and wool-like animal hair on the skin are included under "Hides and skins, undressed, except fur skins;" cashmere goat-hair is included with "Fur skins, undressed." All unmanufactured wool and wool-like animal hair, whether on or off the skin, are combined in Part III of this table under the summary grouping "Wool unmanufactured (including on the skin)." See footnote 8.

[3]Consolidated in Part III of this table with similar commodities, dispersed among one or more other Schedule A commodity sections in Part III, and shown under appropriate descriptive headings.

[4]Includes ores of base-metals customarily used as ferroalloying materials: manganese, chromium, tungsten, titanium, molybdenum, vanadium, zirconium, etc.

[5]Includes base metals customarily used as ferroalloying materials but not yet processed into ferroalloys. (See footnote 4, above.)

[6]Parts and accessories for agricultural tractors are shown under "Transport equipment."

[7]Formal import entries valued at less than $100 and informal entries valued at $250 or less.

[8]Includes carbonized wool and wool-like hair of other animals, on or off the skin—e.g. camels hair, alpaca, cashmere, vicuna, angora, etc.
